**General Study Plan for Third-Cycle Studies in Global politics**  
*Global politik*

---

1. Subject matter and content
2. Intended learning outcomes
3. Requirements for third-cycle studies
4. Admission
5. Selection
6. Education Structure
7. Titles of qualification

## **1. Subject matter and content**

The study of Global Politics is multidisciplinary and incorporates approaches both from the social sciences and the humanities. Transnational and international forms of politics, both in terms of continuity and change, cooperation and conflict, power and contestation, constitute the core of the subject. Seeing as the number of actors on the political arena have multiplied, agency is understood as pluralistic. These have, in turn, contributed to shape institutions and practices that, in different forms, pursue politics beyond the State's domestic arenas. A key question in Global Politics revolves around the need to widen and deepen our understanding of the exercise of power at the global level. Global Politics entails analyses of political, social, economic, and cultural relations and networks across national borders. Some of the subject's key questions concern governance, democracy, and justice in global contexts.

## **2. Intended Learning Outcomes**

The education aims at a doctoral degree in Global politics. The education is intended to provide in-depth knowledge and skills in Global politics. The aim is to educate researchers with in-depth knowledge in theory and research methodology and to provide them with the ability solve problems independently and to assess critically and independently the results obtained. The education is intended to ensure that students are well prepared for independent research tasks or other comparable duties.

According to the Higher Education Ordinance (HEO) the goals for doctoral degree is:

### **Knowledge and understanding**

For the degree of Doctor the third-cycle student shall

- demonstrate broad knowledge and systematic understanding of the research field as well as advanced and up-to-date specialised knowledge in a limited area of this field, and
- demonstrate familiarity with research methodology in general and the methods of the specific field of research in particular.

### **Competence and skills**

For the degree of Doctor the third-cycle student shall

- demonstrate the capacity for scholarly analysis and synthesis as well as to review and assess new and complex phenomena, issues and situations autonomously and critically
- demonstrate the ability to identify and formulate issues with scholarly precision critically, autonomously and creatively, and to plan and use appropriate methods to undertake research and other qualified tasks within predetermined time frames and to review and evaluate such work
- demonstrate through a dissertation the ability to make a significant contribution to the formation of knowledge through his or her own research
- demonstrate the ability in both national and international contexts to present and discuss research and research findings authoritatively in speech and writing and in dialogue with the academic community and society in general
- demonstrate the ability to identify the need for further knowledge and
- demonstrate the capacity to contribute to social development and support the learning of others both through research and education and in some other qualified professional capacity

### **Judgement and approach**

For the degree of Doctor the third-cycle student shall

- demonstrate intellectual autonomy and disciplinary rectitude as well as the ability to make assessments of research ethics, and
- demonstrate specialised insight into the possibilities and limitations of research, its role in society and the responsibility of the individual for how it is used

## **3. Requirements for third-cycle studies**

In order to be admitted to third-cycle studies, the applicant must meet the **general and specific entry requirements** of the subject in question. Moreover, the applicant must be deemed capable of assimilating the education.

### **General entry requirements** (according to HEO Ch. 7.39)

A person meets the general entry requirements for third-cycle courses and study programmes if he or she:

1. has been awarded a second-cycle qualification
2. has satisfied the requirements for courses comprising at least 240 credits of which at least 60 credits were awarded in the second-cycle, or
3. has acquired substantially equivalent knowledge in some other way in Sweden or abroad.

The faculty board may permit an exemption from the general entry requirements for an individual applicant, if there are special grounds. Ordinance (2010:1064).

The **specific entry requirements** for the education stipulate that the applicant has acquired the knowledge and skills equivalent to a second-cycle degree in Global politics or in another subject relevant to Global politics, or has the equivalent knowledge acquired within or outside the country.

**Credits from** previous studies, for example second-cycle studies or courses in a subject that is relevant to the third-cycle studies, may only be transferred after admission to the education. The assessment is performed by the examiner and can only be initiated by the doctoral student.

## 4. Admission

When one or more doctoral student positions in Global politics are available at Malmö University, this will be announced by advertising on the University's website at least two weeks before the application deadline. The applicants are assessed by the faculty according to the stated selection criteria (see Section 5 below) as well as on the basis of any specific requirements for the announced position or positions. The main candidates are ranked in order of precedence and the positions will be offered in accordance with that order. Admission normally takes place twice a year.

Every doctoral student must be assigned at least two supervisors one of which is appointed principal supervisor. Every doctoral student is assigned an examiner. Decisions on supervisors and examiner is taken after admission.

## 5. Selection

Selection among applicants who meet the general and specific entry requirements shall be made with regard to their capacity to assimilate the education (HEO Ch. 7.41)

The following general selection criteria will be used. Specific criteria are found in the announcement depending on the focus of the position in question:

- *independent analysis and approach in previous work*
- *problem formulation and precision in previous work and research plans*
- *methodological and scholarly maturity*

The sole fact that an applicant is deemed entitled to transfer credits from previous education or professional practice will not give the applicant priority over other applicants (HEO Ch. 7.41). The under-represented gender shall be given preferential treatment in a situation where several applicants are equally well-equipped to benefit from the education.

## 6. Education structure

Admission to third-cycle studies is equivalent to four years of full-time study, or 240 higher education credits, leading to a doctoral degree.

The education is composed of courses and scholarly work. Examinations that are included in third-cycle studies are graded on a Pass/Fail basis. Course grades are determined by a specially appointed examiner. A doctoral dissertation is graded by a specially appointed examining committee.

A doctoral degree requires:

- At least 60 credits of courses passed
- 180 credits in the form of an approved doctoral dissertation.

The student is expected to take active part in research seminars and to get his or her work collegial reviewed at at least 3 progression seminars during the study period. The student is recommended to participate in and contribute to national and international conferences.

The detailed structure of each student's third-cycle studies is determined by an individual study plan (see Section 6.3 below).

### **6.1 Courses**

Normal requirements for a doctoral degree comprise 30 credits of specialized courses in Global politics. Moreover, 15 credits of general courses of university wide, multidisciplinary and general character with a focus on theory of science, research methodology and ethics, are normally included. The final 15 credits are normally used to address the student's individual needs in relation to the learning goals.

Courses can be taken at Malmö University, other institutions of higher education and national or international PhD schools.

### **6.2 Scholarly work**

Scholarly work in the form of a dissertation in Global politics is to be designed either as a unified, coherent scholarly work (a monograph), or as a summary of scientific single- or multi-authored publications (a compilation dissertation). Most of the articles that are part of a compilation thesis must be written by the research student alone.

The doctoral dissertation is defended orally at a public doctoral dissertation defence.

The scholarly work, including active participation in the processes of the academic community such as courses, seminars, conferences and international exchange, is organised in such a way that it enables the student to approach all the learning goals (see Section 2).

### **6.3 Individual study plan**

The purpose of the individual study plan is to guide the student's progression and to regulate the collaboration between student, supervisor and faculty/department.

The individual study plan is drawn up jointly by student, supervisor and examiner no later than three months after admission and is formally approved in accordance with the faculty's delegation order. The individual study plan shall be followed up and revised annually at times established in the plan. The follow-up is prepared in the Board of Supervisors for the research education in Global Politics.

## **7. Titles of qualification**

The following titles of qualification are used for Global politics at the Faculty of Culture and Society:

- Filosofie doktor – Doctor of Philosophy (PhD)
